

High voltage (HV) fitter

Role profile

We're looking for an experienced electrical fitter/wireman who will be working on electrical projects ranging from 11kv through to 132kV. The candidate will be required to work closely with other electrical fitters as well as other project staff involved in the design management and installation of the equipment and systems.

Key responsibilities

- Installation and maintenance of electrical switchgear up to and including 33kV
- Installation of cable management systems (trays and trunking)
- Installation and termination of multicore cables
- Ferrule identification and crimping of cores
- Understanding of cable block diagrams, cable schedules and termination schedules (the ability to read schematic drawings is also preferential)
- Mounting and installing a variety of components
- Carrying out installations in accordance with design and legislation
- Completion of documentation
- Liaising with site managers/project engineers
- Escalating and reporting issues to the site manager where required
- Undertaking work in accordance with work package plans, method statements, and risk assessments
- Reporting all safety and environmental incidents and accidents
- The desire to progress within role as it includes the training, guidance and experience necessary to develop.

Skills, qualifications and experience

Essential

- Up to date CSCS Card and first aid certificate
- At least a level two vocational qualifications in an electrical subject
- Able to read electrical schematics at a basic level
- Keen to work in a fast-paced construction environment
- Awareness of the Electricity At Work Regulations
- Full driving licence
- Good level of numeracy and attention to detail
- Energetic and hard-working
- Flexible approach to travelling hours and work location
- Electrical installations experience in an industrial, renewable, or marine setting

Desirable

- CITB safety passport card
- IPAF
- PASMA
- Manual handling training
- Knowledge of MS Office inc. Word, Excel and PowerPoint

In return

As well as a competitive and attractive salary – proportionate to the knowledge and experience of the candidate – we offer the following additional benefits:

- Permanent contract and a rewarding career
- Ongoing professional development and training
- Pension contribution
- Private health and life insurance
- Fully expensed company vehicle and fuel card, or car allowance
- 25 days annual leave plus bank holidays.

How to apply

If you feel you possess the above skills, qualifications and attributes, and would like a confidential discussion with us, please call us or send your CV to recruitment@smithbrothersltd.co.uk. All applicants must have the right to work in the UK.

We require two references on application, one of which ideally from your current/last employer.

Who are we?

Smith Brothers Ltd is a large, turnkey electrical contractor with over 20 years' experience.

Since our inception in 1999, we've worked on a vast portfolio of projects throughout the UK and overseas, both as an ICP and EPC contractor on projects up to 132kV.

Whether we're working on a high or low voltage distribution system, a simple assignment or a complex turnkey project, we have varied and in-depth expertise at our fingertips.

Our team is made up of highly-trained electrical engineers, jointers, wiremen, and fitters - not to mention back-office staff including estimators and project coordinators.

We believe in a flexible working culture, with options to work from home as well as at the company's offices in Elland or Sheffield.
